Eng. Monique Sidaross

Ariana, I like you, I am not taking side of anyone. I am writing to show conflicts in the system.

I am questioning why the media and politics alter and falsify facts and cut statements of the speakers and cover up on crime and illegality. Trump's statement clearly stated ".....temporarily until America figures out what the hell is going on". Why this half of the statement is absence? Even if his idea is debatable by some, but why cut his statement in half to make it look wrong and alter his intention? This is illegal. Are deaths of hundreds of citizens and Christians not important? Hundreds of employees and engineers converted to islam under duress or may lose their job and get killed inside the sate workplace? Is this the constitution and the freedom in America? I lost my job for same fact but no body cared? They killed me several times and I woke up.

I was elected the first woman engineer for the union in its 36-yr history in America (the free country and right of women, obviously not for woman engineer), I wanted to cause social change for the corruption of the mafia union (non licensed engineers) and the injustice who caused death of hundreds of engineers inside the building for 20 years by careless union, but neither the media nor politics cared...they wanted the system to stay corrupt, so they opposed and sacrificed the first female engineer by criminal way, defamed my name, ceased my salary and forged tax documents against me, and sent me gangs while I am studying for the doctoral degree in engineeringit is all crap...everything is documented in the court where judges wanted to bribe me \$20,000.00 and forged documents and captions (what a cheap offer to woman engineer and what illegality inside closed court doors), bribe me to close the case and cover up on the union crime and harassment to woman engineer. I declined of course. What a great constitution adopted inside the courts that also sent me gangs at home to kill me, in addition that a judge willfully sent me insult note on Christmas instead of greeting! Why they support a religion but hate another. Is this the freedom in America???

I have served the country in unique status in teaching math and calculus and engineering --- knowledge and power that on one of all those voices and media and politics can acquire or learn. Why no one stood up for justice for a woman engineer? But now everyone wants to cover up on suspicious issue for the elected male president but ignore the right of elected female president...? The media avoids addressing my case or solve it, the radio interviews of couple of years are all hidden now and royalty of my book is stolen... they have no right to decide or rule for money of woman engineer....it is all ignorance and mafia... but it is okay for the media to ignore right of woman. They all lack solving problems, but they continue altering issues by

negative ways always. I disagree on the articles mentioned above because it altered facts as it happened in the incidents I listed in this post. My advice is that the media and politics should stop this game because they look bad and lose trust of citizens and the world. I reserve my right for protection against further retaliation or harm or gangs or spy or altering documents and harassment on the road because I say the truth. When I get my rights, my language will change.

I would like to wish you and all your staff and the media a very Merry Christmas full of joy, happiness, and blessing.

Best regards,

Eng. Monique Sidaross, MSCE, PhD Doctorate in progress

Hon. Deputy Governor, International Congress
American Medal of Honor, Advisor to the White House since 2003
Professional International Civil Rights Leader,

Eng. Monique Sidaross

“President Obama, please take my comments with open mind.

Unfortunately, your claim is incorrect. You have gotten your right and more as First African American President, but I, as a white female engineer and as the First woman engineer President Elect of the Union in its 36-yr history in the free country....I only faced defamation, gangs, crime, and stealing my income and book royalty and home belongings by judges and police undercover with silent gun and chemical inside residential community.

If I were African American, you would have not left her without income or justice, and you and entire community of African Americans would have claimed discrimination, but obviously I had no right being non-African

American, female, Christian, engineer. I sent several mails before I got frustrated but I received no reply. Now I am frustrated on the internet because I face gangs and killing and harassment on the road, I will not be charming of course. I can change back though after I get my rights completely. All crime and forging documents or hidden accusations against me without my knowledge or consent are null. Government has no right to spy on citizens, laws to be thrown in trash, if government cannot find real criminals, it has no right to harass educated women in our job, income, life, and education while the entire system needs adjustment.

This is the truth and advice, and I reserve my right against any retaliation or harm or gangs. Nothing will work but solving the problem by getting my rights. We have rights for protection and safety of life. My nice attitude and image, and my unique knowledge and power have been defamed and altered illegally in America with no justice. Despite all these, I do respect you, I never hate anyone, but I insist to get all my rights fully without court involvement. All hierarchy of courts are corrupted and scam, they wasted my time. This court has to be closed. It is ended for me. My right should be offered by the governor and the president upon my explanation of each incident and its compensation. Woman engineer is special, not something among the crowd, this country has to learn how to respect woman engineer.

I would like to take this opportunity to wish you, Michelle, Malia, and Sasha, and all the White House Staff a very Merry Christmas full of joy, happiness, and blessing.

“Donald Trump has a 'huge' following, but his followers, like Trump himself seek simplistic answers to complex issues. Bomb this country, build that wall, just-trust-me-it-will-be-fabulous, etc., etc., etc., are not answers... they are provocations

”

Eng. Monique Sidaross

Jim, do you trust others? They did nothing during their assumed great past history in politics, they ignited issues and then coming to pretend will solve it, why suddenly when they become presidents they will save the country !!! There is no proof. It is all games. That is the reason we are in this disaster, Christians are destroyed in here, I am first and I will not let the injustice to go silent--- see my long post right above yours few counts--- just little note of what happened, I am aware of worst stories that they did not solve it and then now they want to run for presidency to solve greater issues in same problem!!!?? Cases in courts closed to cover up on such disaster and let it grow. Dishonesty, sneaky smiling, spy, gangs, and lies are so dangerous. If they could not proof ability to solve problems before, they are not qualified to go further. The society became weak, legal people cannot think or solve problems nor education nor citizens problems internally, they will not be able to solve international problems as well. This is the logic of thinking.
Thank you for sharing your opinion.
